

To Whom It May Concern,

I urgently request you DO NOT undermine our political system any more than it already is. The film about Senator Kerry refuses to accept responsibility for real life actions and behaviors that caused unfathomable suffering. Tragically, denial of what many say DID happen in Vietnam, and IS happening still today, is what keeps this nation and world at war. War is antithetical to a civilized society. War serves nothing, only increases acts of violence and never ends this vicious cycle. More men and women SHOULD question militaristic initiatives that aspose to have "democracy" at the core. Sinclair is braking every moral, and anti-trust law. IF the FCC allows them to proceed, the final nail will have been driven into the coffin of U.S. credibility around the world.

If this nation expects to be taken seriously, if our credibility and honor are still attributes worthy of consideration, this offensive tactic by Sinclair should be stopped and local stations should not be forced to show whatever this piece is.

We'll see what Sinclair does when I try to show any real footage of how this nation tortures cows, pigs, chickens, ducks, calves and every other "farmed" animal brutalized by human hands for the meat market culture we nurture.
